

Finsolv® TN-O

INCI Name: C₁₂₋₁₅ Alkyl Benzoate

CAS No.: 64411-27-8 EINECS No.: 270-112-4

Finsolv® TN-O

Finsolv® TN-O is a further refined version of C₁₂₋₁₅ Alkyl Benzoate which has been rendered odour free.

Functionally identical to Finsolv® TN, Finsolv® TN-O is recommended for those instances where even slight background odour from formulation ingredients conflicts with the desired characteristics of the final fragrance. This issue is of particular concern in the growing "fragrance free" segment as well as in the fine fragrance market.

As stated above, Finsolv® TN-O retains all of the advantageous properties of Finsolv® TN. Specifically, Finsolv® TN-O confers a dry, talclike feel, is extremely mild to skin and eyes, spreads easily (high spreading coefficient) and is a valuable solvent for many cosmetic ingredients, including sunscreens.

Finsolv® TN-O is useful as a sophisticated emollient/solvent in all skin and hair care formulations where low or no background odour is a critical requirement. Some suggested product types include: sunscreens and after-sun products, all types of decorative cosmetics, hand and body lotions, bath and after-bath products, shampoos and conditioners, hair fixatives and sprays, and fine fragrances.

Product Specification (Not intended for use in preparing specifications)

Actives	100%
Form	Practically colourless liquid
Odour	Practically nil
Viscosity cps	35 - 40
