

Structuring Agent

Sensymer PH

INCI Name: Polyethylene

CAS No.: 9002-88-4

Sensymer PH is a polyethylene wax which is suitable for use as an exfoliating agent in cleansing applications. It can also be used as a thickener in anhydrous oil based formulations.

Applications

Due to its high hardness, spherical shape and particle size, Sensymer PH is recommended as an exfoliating agent which can be used in most hand and foot scrubs for normal skin

Sensymer PH can be incorporated in oil based systems to impart thickness and eveness.

Handling & Storage

Store in original packaging at ambient temperature in a dry place

Sensymer PH is classified as non-hazardous

Please refer to the product MSDS for further information

TYPICAL PROPERTIES

Not intended for use in preparing specifications

Appearance	White powder
Density, g/cm ³	0.93
Average Particle size, µm	500-700
Particle shape	Spherical
Hardness/Needle Penetration, 0.1mm	<1
